Set in 5.82 acres of manicured grounds, both the exterior and the interior of this residence blend classic details with contemporary highlights and smart-house technology. The masterful result is a home with 15,980sf of living space that provides a full range of amenities for the family's living, working and recreational needs. Predominantly of Georgian Revival architecture, the main body of the house features an elegant classic foyer with bridal staircase, traditional living and dining rooms, and a library with mahogany paneling. This section of the home has an expansive kitchen with a family dining area incorporating a stone fireplace. The family dining area is set in a bay and surrounded by windows overlooking the magnificent terraces and gardens. The garden level incorporates a recreation room with a bar, a home theatre and a fitness room. The Southern plantation-style east wing is dominated by the family room which has numerous French doors opening to a wraparound verandah. The upper level of this wing has a conservatory-style sunroom and a large deck, both private to the lavish master suite. The New England barn-style west wing comprises a 4-car heated garage and a full guest-suite on the second floor. The European-style rear pavilion contains a 37' swimming pool below a vaulted three-story cathedral ceiling. Around the residence are multiple terraces and feature gardens. In 2018, approximately \$1,500,000 was invested in the residence, returning it to new construction condition.
